Entry Requirements:

Building a sustainable tomorrow. That’s our mission and our promise at BAM. It’s how we engineer vital infrastructure and construct high-quality buildings as one of the largest construction companies in Europe. With around 6,500 employees, we operate in Construction, Civil Engineering, Ground Engineering, Energy, Property Development, Facilities Management, and Site Solutions.

Business

Construction

Training provided

Level 4 Construction quantity surveying technician

Pay details

£23,000 pa

Hours

42.5 hours per week

Requirements

- 2 A Levels in STEM subjects, finance, business or economics or equivalent
- 5 GCSEs at grades 9-4 including English, and maths at grades 9-5
- Disciplined and able to manage degree level study and a busy job role
- A passion and desire to learn and grow within the industry?
- Highly numerate with an attention to detail
- Able to adapt when priorities change
- Happy to work on site and travel as and when required
- Punctual, reliable, and committed to delivering high-quality work
- Strong communication and teamwork skills

This is a regional position, however candidates must be willing to travel to site and work away from home when necessary. A full UK driving licence is not essential for this role; however, you must be able to travel independently and reliably to our sites and offices as required.

Minimum age

16

Description

Quantity surveyors are the construction professionals who make up our commercial management team. As a quantity surveying apprentice, you will work predominantly on site, supporting the delivery of projects and learning from experienced professionals. Your day to day will include:

- Gaining hands-on experience and putting your learning into practice
- Learning how to overcome challenges on live projects
- Driving quality through effective planning and right first-time delivery
- Being part of real construction projects and working closely with our skilled workforce
- Applying your learning and knowledge in real-world scenarios
- Learning how to apply and manage contracts
- Monitoring costs associated with projects
- Working with the senior quantity surveyors and site team to ensure any changes to cost and materials are recorded
- Maintaining high personal standards in health and safety
- Maintaining high standards in environmental awareness and behaviour
- Monitoring and recording delivery against the agreed programme and construction methods

How to apply

Please apply on the company's **website**.
