Description

Civil Engineers are the construction professionals who make up our site supervisory and management team. Our Civil Engineering Apprentices work predominantly on site, turning designs into reality. Your day to day will include:

- Collaborating with experienced engineers on the design, planning and execution of civil engineering projects
- Communicating effectively at all levels
- Assisting with planning and coordination of site activities
- Maintaining good working relationships with client, designer, supply chain and others
- Gaining hands-on experience with engineering tools and processes
- Learning how to use specialist setting out equipment
- Learning how to overcome challenges on live projects
- Driving quality through effective planning and right first time delivery
- Being part of real construction projects a
- Maintaining diaries of site activity
- Helping to ensure that work is carried out safely
- Maintaining high personal standards in Health and Safety
- Maintaining high standards in environmental awareness and behaviour
- Monitoring and recording delivery against the agreed programme and construction methods
- Ensuring that works are accurately and clear set out before work commences
